# 1 Introduction

We will in no way answer all questions linked to the aforementioned methods. So that anyone can reproduce or continue our studies, we list all the code, results and instructions on running the code in our GitHub repository<sup>1</sup>.

## 2 Theory

In the theory-section we aim to give a brief explanation of the main concepts and terminology used in this report. For a more in-depth explanation we recommend reading the appropriate sections in [1], which has been of great inspiration and help for us throughout the project.

## 3 Method

## 4 Results

## 5 Discussion

## 6 Conclusion
